

TREVI is to build the foundations for the “Ferrari Experience” in Abu Dhabi, a contract worth US\$ 27 million

In 2008 Trevi Group expects growth of 25% in its United Arab Emirates special foundation business

Cesena, 10 January 2008

TREVI Group, through its subsidiary Swissboring Overseas Piling Corporation, has won a US\$27 million contract in Abu Dhabi for the foundations of the “Ferrari Experience”.

The joint project, between the Italian group, Ferrari, and ALDAR Properties PJSC, involves the construction of a Formula 1 racing circuit and a “Ferrari Experience” theme park (circa 250,000 sqm of which 80,000 sqm indoor). It will include logistic, recreational and commercial buildings inspired by the Ferrari brand. It will be a truly extraordinary oasis, rich in adventure, hospitality and beauty, which will embrace the culture and true spirit of Italy, as well as the legendary automotive history, passion and tradition of Ferrari GT and F1 cars.

The theme park should be completed by November 2009.

The foundation works, expected to be completed by mid-2008, will comprise a diaphragm 2.2 kms long for the circuit and foundation piles for the theme park.

The foundations built by TREVI Group confirm the Made in Italy technological quality of the project and the level of excellence reached by Swissboring, which has completed over 7,500 special foundation engineering projects.

Gruppo TREVI's presence in this geographical area is strategic, also given the ambitious urban development project, "Plan Abu Dhabi 2030", launched by the local government in September 2007.

Davide Trevisani, Chairman and Managing Director of Gruppo TREVI stated, " The United Arab Emirates is one of the most important geographical areas of interest for the Trevi group and it expects growth of 25% in its special foundation business in the region in 2008".

Mr Trevisani also commented that the 2007 results of Gruppo Trevi will be better than market expectations both for Total Consolidated Revenues and Profit after tax.

Business activity in the last months of the financial period continued to grow. At the same time, new order inflow has been excellent in all the major markets in which the Group is present. This indicates that growth in 2008 will be similar to that of 2007, both in the infrastructure and the energy sectors.

About TREVI GROUP:

Trevi Group is a worldwide leader in the field of soil engineering (special foundations, tunnel excavations, soil consolidation and the building and marketing of special rigs and equipment relevant to this engineering sector); the Group is also active in the drilling sector (oil, gas and water), both in the production of plant and the supply of services, and it also builds automated, underground car parks. The Group was established in 1957 and today has more than 30 branches in as many countries. Its success is due to the vertical integration of the main divisions making up the Group: Trevi, the division that supplies special services in the field of soil engineering and drilling; Soilmec, the division that produces and develops rigs and equipment for soil engineering; and Drillmec, the division that produces and develops drilling rigs (oil, gas and water). The parent company has been listed on the Milan Stock Exchange since July 1999. Total Revenues in 2006 amounted to € 642.4 million; EBITDA to € 85.6 million (13.3%); EBIT to € 58 million (9%); Net Profit to € 26.8 million.
