## **Gruppo Trevi: receives the Shell Environmental Excellence Award 2007 from the New Zealand Contractors' Federation for its attention to environmental protection**

Gruppo Trevi, through its subsidiary Trevi Construction HK, in association with the leading New Zealand companies Mighty River Power and Brian Perry Civil, has recently completed consolidation work and security standard enhancements on the Arapuni dam in New Zealand.

The considerable technical complexity of the work (secant micropiling to a depth of 90 metres, an achievement never previously accomplished anywhere in the world) and the extremely high security and environmental protection standards required by the work (the dam is built on the Waikato river which is considered sacred by the Maori) made this contract unique.

The International Technical Commission, which was called upon to evaluate the standard of the work carried out by an alliance of the three companies involved, declared its complete satisfaction with the effectiveness of the project. This has been acknowledged by the conferral of the "**Shell Environmental Excellence Award 2007**", an important commendation by the **New Zealand Contractors' Federation** in partnership with **Shell New Zealand** for the protection of the environment.

### **About TREVI GROUP:**

Trevi Group is a worldwide leader in the field of soil engineering (special foundations, tunnel excavations, soil consolidations and the building and marketing of special rigs and equipment relevant to this engineering sector); the Group is also very active in the drilling sector (oil, gas and water), both in the production of plant and the supply of services, and it also builds automated, underground car parks.

The Group was established in 1957 and today has 23 branches in as many countries. Its success is due to the vertical integration of the main divisions making up the Group: Trevi, the division that supplies special services in the field of soil engineering and drilling; Soilmec, the division that produces and develops rigs and equipment for soil engineering; and Drillmec S.p.A., the division that produces and develops drilling rigs (oil, gas and water).

The holding company has been listed on the Milan Stock Exchange since July 1999. Total Revenues in 2006 amounted to € 642.4 million; EBITDA to € 85.6 million(13.3%); EBIT to € 58.1 million (9%); Net Profit to € 26.8 million.
