

TREVI IS AWARDED NEW ORDERS IN THE MIDDLE EAST TOTALING ABOUT 84 MILLION USD

Cesena, 30 September 2014 – The **TREVI** division, specialized in ground engineering services, has recently been awarded new contracts in the Middle East totaling about **84** million USD:

Among the primary ones we highlight:

- Civil engineering works and special foundations for the realization of different lines of the Riyadh metro in Saudi Arabia. These works are part of an important project for the enhancement of the metro system of the city and will require the execution of special foundations with the best technology available on the market. The contract includes more specifically the execution of large diameter piles, micro-piling and anchoring which will be carried out with special equipment produced by the SOILMEC division. The works will be performed by TREVI for relevant international partners with the immediate start of jobsite operations.

This major contracts, worth **36** million USD, confirm the active presence of the Group in the large infrastructure market of Saudi.

- **TREVI** was also been awarded a series of medium sized contracts worth a total of about **48** million USD in the UAE, Oman, Saudi Arabia and Qatar to carry out ground consolidation for infrastructure works to reduce the risk of soil liquefaction. These works will be carried out with SOILMEC machinery, designed and developed purposely for these types of jobs. The contracts mainly relate to infrastructure projects such as industrial complexes, hospitals, universities, real estate developments and refineries.

The CEO of TREVI Group Gianluigi Trevisani commented: *“The recent acquisitions of the TREVI division confirm the potential development of the infrastructure market in geographical areas of historical interest to the Group. Works on the construction of the metro line in Riyadh testify the continuing interest to carry out civil works of urban transport in areas such as the Middle East.*”

The works relating to ground consolidation continue to have great interest from the market and thanks to the development of SOILMEC's technology we are able to offer the best services on the market. The recent order intake allows us to maintain a very robust backlog which represents a solid foundation for the Group's growth in the coming years".

About TREVI GROUP:

Trevi Group is a worldwide leader in the field of soil engineering (special foundations, tunnel excavation, soil consolidation and the building and marketing of special rigs and equipment relevant to this engineering sector); the Group is also active in the drilling sector (oil, gas and water) both in the production of plant and the supply of services, and it also builds automated underground car parks. The Group was established in Cesena in 1957 and today has more than 30 branches and is present in over 80 countries. Its success is due to the vertical integration of the main divisions making up the Group: **Trevi**, the division that supplies special services in the field of soil engineering, **Petreven**, the oil drilling division of the Group, **Soilmec**, the division that produces and develops plant and machinery for soil engineering and **Drillmec** the division that produces and develops drilling rigs (oil, gas and water).

The parent company TREVI – Finanziaria Industriale Spa has been listed on the Milan stock exchange since July 1999. The key financial figures for 2013 are: Total revenues of €1,275.8 million, EBITDA of €143.8 million (margin of 11.3%), EBIT of €80.3 million (margin of 6.3%), and NET PROFIT of €13.8 million.
