

ACQUIRED NEW ORDERS IN COLOMBIA, PERU AND IN AZERBAIJAN TOTALING ABOUT 77 MILLION USD

Cesena, November 4th 2014 – TREVI Group has signed through its subsidiary in Colombia a major new contract for the construction and execution of foundation works for a primary shopping complex in the Capital.

The project involves the construction of special foundations, a continuous diaphragm wall of 33,000 cubic meters and 47,000 cubic meters of bored piles with a diameter ranging from 0.8 to 2.5 meters. For the first time in Colombia Soilmec Hydromill technology will be used, an advanced excavation system that will open opportunities for several additional projects. All civil works will be carried out with the latest technology provided by SOILMEC that will ensure maximum efficiency in carrying out the work.

Petreven, a TREVI Group company, which specializes in oil drilling services, has signed with **Petrobras** in Peru a long term contract of eighteen months for the provision of drilling services.

In executing the drilling activities, Petreven will use HH Drillmec rigs specialized in vertical and horizontal drilling. (The rigs have a capacity of about 100 tons and are equipped with the latest onshore drilling technology that allow to reach the theoretical depths of 2,500 and 3,500 meters.)

Petrobras currently operates in four areas of onshore concession in the district of El Alto, in the province of Talara in northwest Peru. The company conducts oil exploration in three areas and has already started production in one of them.

Drillmec, a TREVI Group company, has also signed a contract for the supply of a **3,000 HP** offshore rig for **NOBEL OIL Ltd**, a drilling and services company that is expanding its activities both in Azerbaijan and internationally. The rig will be installed on a fixed platform in the offshore field of Bulla Deniz, owned by the state company **SOCAR**. This is the sixth offshore Drillmec rig that will operate in the Caspian Sea. The company had already signed last April a contract for the supply of a HH300 Offshore. This contract further confirms the appreciation and trust Nobel Oil recognizes to Drillmec's professionalism and technology. Azerbaijan has quickly become one of the main industrial centers of oil in the world, able to meet almost half of the global demand for oil.

Davide Trevisani, CEO of TREVI Group stated: *“The award of these new contracts confirms the growing interest of the Group internationally. The recent contract acquisition of TREVI division demonstrates the need for civil works and the strategic importance of special foundations in the development of urban centers. The Petreven division, actively present for many years in Latin America, has managed to win a new long-term contract with Petrobras. The onshore oil drilling activities continue to be highly desired in areas of strategic interest and the ongoing relationship with Petrobras further strengthens the presence of Petreven in country. The recent discoveries of hydrocarbons require ever more advanced technologies and our Oil & Gas division continues to ensure the execution of the drilling activities in absolute safety and with a significant reduction of costs. Drillmec continues the acquisition of major contracts with favorable economic conditions in areas of strong growth. We are confident of further developments in the area and the award of these contracts confirms the Group's ability to establish long-term relationships with strategic customers.”*

About TREVI GROUP:

Trevi Group is a worldwide leader in the field of soil engineering (special foundations, tunnel excavation, soil consolidation and the building and marketing of special rigs and equipment relevant to this engineering sector); the Group is also active in the drilling sector (oil, gas and water) both in the production of plant and the supply of services, and it also builds automated underground car parks. The Group was established in Cesena in 1957 and today has more than 30 branches and is present in over 80 countries. Its success is due to the vertical integration of the main divisions making up the Group: **Trevi**, the division that supplies special services in the field of soil engineering, **Petreven**, the oil drilling division of the Group, **Soilmec**, the division that produces and develops plant and machinery for soil engineering and **Drillmec** the division that produces and develops drilling rigs (oil, gas and water).

The parent company TREVI – Finanziaria Industriale Spa has been listed on the Milan stock exchange since July 1999. The key financial figures for 2013 are: Total revenues of €1,275.8 million, EBITDA of €143.8 million (margin of 11.3%), EBIT of €80.3 million (margin of 6.3%), and NET PROFIT of €13.8 million.
