

TREVI IS AWARDED A NEW IMPORTANT ORDER IN EGYPT TOTALING ABOUT 75 MILLION EURO

Cesena, 5 June 2015 – The **TREVI** division, in addition to regularly acquired orders, has recently been awarded a new important contract in Egypt totaling about **75** million Euro.

The contract relates primarily to transport infrastructure projects considered to be strategic for the development of the country.

The order acquired, more specifically, involves the execution of diaphragm walls one of the most developed technologies of TREVI Group. The reinforced concrete diaphragm walls are structural barriers built underground from the surface and used as excavation support, foundation element or as containment structure for the flow of underground water. Diaphragm walls are an important part of the underground construction works also as they can be built with a relatively minor degree of disruption.

The project will be executed by TREVI in Joint Venture with one of the major international companies with immediate start of the works given the down payments received in the range of 15% of the value of the contract.

The CEO of TREVI Division, Stefano Trevisani, commented – *“The recent acquisition from TREVI division confirms the high potential development of the core business. After the recent acquisitions recorded during the first quarter, TREVI Division has confirmed its leadership in the execution of infrastructure projects in geographical areas of historical interest. There is continued activity of contracts in this sector and the order book is enriched with new and important acquisitions that form the base of future development of the business. The contract awarded of this new job represents a factor of particular success given that the solutions provided by TREVI Group are among the most advanced in the industry. The infrastructure market as a whole continues to be*

very interesting and additional projects of civil works are expected. We remain well positioned both geographically and commercially to increase the volume of our business and to provide greater added value to company”.

About TREVI GROUP:

Trevi Group is a worldwide leader in the field of soil engineering (special foundations, tunnel excavation, soil consolidation and the building and marketing of special rigs and equipment relevant to this engineering sector); the Group is also active in the drilling sector (oil, gas and water) both in the production of plant and the supply of services, and it also builds automated underground car parks. The Group was established in Cesena in 1957 and today has more than 30 branches and is present in over 80 countries. Its success is due to the vertical integration of the main divisions making up the Group: **Trevi**, the division that supplies special services in the field of soil engineering, **Petreven**, the oil drilling division of the Group, **Soilmec**, the division that produces and develops plant and machinery for soil engineering and **Drillmec** the division that produces and develops drilling rigs (oil, gas and water).

The parent company TREVI – Finanziaria Industriale Spa has been listed on the Milan stock exchange since July 1999. The key financial figures for 2014 are: Total revenues of €1,250.7 million, EBITDA of €126.4 million (margin of 10.1%), EBIT of €62.6 million (margin of 5.0%), and NET PROFIT of €24.4 million.
