

TREVI IS AWARDED NEW ORDERS IN ALGERIA AND IN THE PHILIPPINES TOTALING ABOUT 115 MILLION EURO

Cesena, 13 July 2015 – The ground engineering services division **TREVI** has been awarded important contracts in North Africa and in the Far East totaling about **115** million Euro.

In Algeria **TREVI** was conferred the final contract for geotechnical works for two extensions of the current "Metro Algiers" system for a total of 11.9 kilometers of new tracks; 11 underground stations have been designed and will be developed for this project. With these new extensions the "Metro Algiers" system will also reach the international airport of El Harrach in the capital, and will give a substantial boost to the use of public transportation in operation since 2011.

This new award is very significant if we consider that **TREVI** has operated in recent years for the geotechnical works of all the existing sections of "Metro Algiers" bringing the most advanced and specialized techniques with full satisfaction of the customer.

TREVI division was also awarded a contract in the Philippines for the construction of an urban motorway viaduct (Skyway) with 6 lanes and a total length of about 14 km located in Metro Manila. Skyway represents one of the most important and complex infrastructure projects of the Philippines of the last decade and will be carried out in complex logistical and geotechnical conditions. The new urban motorway flyover will divide the congested city of Metro Manila in half and 8 junctions will be developed for this purpose.

TREVI will lastly be involved in the realization of special foundations works for the residential project "Empire East-Kasara" in the Philippines. Various residential towers will be built for luxury apartments that will represent an exquisite combination of modern architecture and nature.

The CEO of TREVI Division, Stefano Trevisani, commented – *“We are very satisfied with the recent acquisitions of the division TREVI. The awarding of these contracts and the acquisitions of the prior weeks amount to approximately 200 million Euro that are to be added to an already substantial order intake. The demand for special foundations from these geographic areas shows a very positive trend in the construction market. The award of the entirety of the foundation works of the subway of Algiers and the awarding of the Skyway project in the Far East are clear examples of how the company's reputation and the exemplary track record in the works ensures the development and continuity of this division”.*

About TREVI GROUP:

Trevi Group is a worldwide leader in the field of soil engineering (special foundations, tunnel excavation, soil consolidation and the building and marketing of special rigs and equipment relevant to this engineering sector); the Group is also active in the drilling sector (oil, gas and water) both in the production of plant and the supply of services, and it also builds automated underground car parks. The Group was established in Cesena in 1957 and today has more than 30 branches and is present in over 80 countries. Its success is due to the vertical integration of the main divisions making up the Group: **Trevi**, the division that supplies special services in the field of soil engineering, **Petreven**, the oil drilling division of the Group, **Soilmec**, the division that produces and develops plant and machinery for soil engineering and **Drillmec** the division that produces and develops drilling rigs (oil, gas and water).

The parent company TREVI – Finanziaria Industriale Spa has been listed on the Milan stock exchange since July 1999. The key financial figures for 2014 are: Total revenues of €1,250.7 million, EBITDA of €126.4 million (margin of 10.1%), EBIT of €62.6 million (margin of 5.0%), and NET PROFIT of €24.4 million.
