

## **TREVI GROUP celebrates forty years in Argentina**

*In 2011 record sales in the country*

TREVI Group has been historically present in Argentina with two distinctive companies: Pilotes Trevi, 40 years involved in the industry of the large ground works and Petreven offering oil drilling services to large oil companies since 7 years.

Pilotes Trevi, that celebrates during these days the 40th anniversary of its foundation, has participated to the execution of important national projects that have left a mark in the history of the large infrastructural works in Argentina, among which the bridges **Rosario-Victoria**, Zarate, Brazo Largo, de La Mujer and the large dams of **Caracoles**, **Yaciretá**, Limay, Potrerillos. The involvement of Pilotes Trevi included the execution of many ports and harbor works.

By the end of 2011, the Group is expected to reach its record sales in Argentina of 100 million dollars, an increase of 11% with respect to 2010.

These results were the consequence of numerous investments carried out by the Group in these latest years. It's important to note that from 2006 to this day, the Group has invested in machinery and equipment, more than 53 million dollars only in Argentina and 21 million in Chile. The outcome is that the company holds numerous and innovative equipment for a large range of technologies that allow the execution of foundations works, treatment and ground consolidation and the most innovative equipment for oil drilling as well.

It's worth to recall that in Argentina, the company manages all the projects carried out in Chile, Uruguay, Paraguay, Bolivia and Brazil.

*"One of our major assets is human resources - commented Ruben Moleon, managing director of Pilotes Trevi -, consisting of a team of professionals with more than 30 years of experience in our company in which they learned the leading technologies in the reference sector in order to transfer them today to the local market. Between Argentina and Chile we can count on about 700 people".*

### **About TREVI GROUP:**

Trevi Group is a worldwide leader in the field of soil engineering (special foundations, tunnel excavation, soil consolidation and the building and marketing of special rigs and equipment relevant to this engineering sector); the Group is also active in the drilling sector (oil, gas and water) both in the production of plant and the supply of services, and it also builds automated underground car parks. The Group was established in Cesena in 1957 and today has more than 30 branches and is present in over 80 countries. Its success is due to the vertical integration of the main divisions making up the Group: Trevi, the division that supplies special services in the field of soil engineering, Petreven, the oil drilling division of the Group, Soilmec, the division that produces and develops plant and machinery for soil engineering and Drillmec the division that produces and develops drilling rigs (oil, gas and water).

The parent company TREVI – Finanziaria Industriale Spa has been listed on the Milan stock exchange since July 1999.

The key financial figures for 2010 are: Total revenues of €952.9 million, EBITDA of €137.3 million (margin of 14.4%), EBIT of €84.3 million (margin of 8.8%), and NET PROFIT of €46.4 million.
