

TREVI AWARDED NEW ORDERS TOTALING ABOUT 120 MILLION USD

Cesena, 20th January 2014 – The **TREVI** division, specialized in ground engineering services, has recently been awarded new contracts in various countries totaling about **120** million USD:

- **TREVI S.p.A.** will perform civil works and special foundations for infrastructure projects in West Africa and in Asia. The works, in particular, provide for the execution of bored piles onshore and offshore involving the use of innovative equipment for special foundations produced by the Soilmec division. The total value of the works is approximately **50** million USD.

- **TREVIICOS**, a subsidiary of the TREVI Group in the USA, has been awarded a series of special foundations works in New Orleans, Florida, Washington D.C. and Boston. Works will include ground consolidation & safety, installation of tie-rods for the construction of infrastructure and diaphragm walls. These new contracts confirm the capability of the company to acquire technologically complex projects in historical areas of the United States. The contracts are worth approximately **45** million USD.

- In the Middle East **TREVI** has been awarded several contracts for infrastructural works relative to ground consolidation for new highways and high-rise buildings for commercial and residential use. The total value of the works is of approximately **25** million USD.

The CEO of TREVI Group Stefano Trevisani commented: *“The acquisition of these new orders in areas of historical interest confirm the customers’ appreciation towards the Group and the ability to execute complex projects. The newly acquired works in the United States demonstrate the positive trends to be registered again this year in the infrastructural sector. West Africa and the Middle East, once again, prove to be areas of significant development, as there seems to be a gradual recovery in demand for civil works in the region. This year, the infrastructure sector as a whole*

proves to be very interesting and there are new civil works projects that require the intervention of highly technologically equipped operators such as the TREVI Group. We remain well positioned both geographically and commercially to increase the volume of our business and to provide greater added value to company.”

About TREVI GROUP:

Trevi Group is a worldwide leader in the field of soil engineering (special foundations, tunnel excavation, soil consolidation and the building and marketing of special rigs and equipment relevant to this engineering sector); the Group is also active in the drilling sector (oil, gas and water) both in the production of plant and the supply of services, and it also builds automated underground car parks. The Group was established in Cesena in 1957 and today has more than 30 branches and is present in over 80 countries. Its success is due to the vertical integration of the main divisions making up the Group: **Trevi**, the division that supplies special services in the field of soil engineering, **Petreven**, the oil drilling division of the Group, **Soilmec**, the division that produces and develops plant and machinery for soil engineering and **Drillmec** the division that produces and develops drilling rigs (oil, gas and water).

The parent company TREVI – Finanziaria Industriale Spa has been listed on the Milan stock exchange since July 1999. The key financial figures for 2012 are: Total revenues of €1,115.3 million, EBITDA of €112.3 million (margin of 10.1%), EBIT of €47.5 million (margin of 4.3%), and NET PROFIT of €10.8 million.
