## TREVI AWARDED MAJOR REHABILITATION PROJECT OF BOLIVAR DAM (OHIO-USA) AND OTHER MINOR WORKS TOTALING ABOUT 50 MILLION USD

**Cesena, 3<sup>rd</sup> March 2014** – The U.S. Army Corps of Engineers, Huntington District, issued a Notice of Award to TREVIICOS (TREVI Division) for the Major Rehabilitation of Bolivar Dam in Ohio for about **44** million USD. In the western State of Wyoming, the subsidiary TREVIICOS was also awarded a contract for approximately **6** million USD for the construction of cut off walls for a new dam for a mining complex near Green River.

The Bolivar Dam project will consist of the construction of a seepage barrier approximately 4,500 ft. (1,372 meters) in length and a maximum depth of 144 ft. (44 meters) through the upstream slope of the dam embankment along the left abutment. Drilling and grouting along an alignment approximately 300 ft. (91 meters) in length by 60 ft. (18 meters) average depth in the left abutment of the dam from the end of the seepage barrier to near the emergency spillway is also required as part of the project. The containment barrier will be installed using Soilmec's special equipment which will ensure the best technology for the works. The seepage barrier shall be a minimum of 24 inches (0.6 meters) wide through the entire length and depth and shall be continuous and homogeneous.

The CEO of TREVI Group Stefano Trevisani commented: *"We are very pleased with these acquisitions and in particular with the new order from the U.S. Army Corps of Engineers. The Bolivar Dam, in the State of Ohio, is overall the sixth complex work commissioned to the Group and confirms the confidence placed in the excellence of execution of TREVI. TREVIICOS was awarded the Project within a complex tender which carefully considered both the economic offer*

and the technical solution selected for the project. This announcement, along with the recent acquisitions of the last few weeks, continues to show the clear trend of improvement of the international infrastructure sector."

### About TREVI GROUP:

Trevi Group is a worldwide leader in the field of soil engineering (special foundations, tunnel excavation, soil consolidation and the building and marketing of special rigs and equipment relevant to this engineering sector); the Group is also active in the drilling sector (oil, gas and water) both in the production of plant and the supply of services, and it also builds automated underground car parks. The Group was established in Cesena in 1957 and today has more than 30 branches and is present in over 80 countries. Its success is due to the vertical integration of the main divisions making up the Group: **Trevi**, the division that supplies special services in the field of soil engineering, **Petreven**, the oil drilling division of the Group, **Soilmec**, the division that produces and develops plant and machinery for soil engineering and **Drillmec** the division that produces and develops drilling rigs (oil, gas and water).

The parent company TREVI – Finanziaria Industriale Spa has been listed on the Milan stock exchange since July 1999. The key financial figures for 2012 are: Total revenues of €1,115.3 million, EBITDA of €112.3 million (margin of 10.1%), EBIT of €47.5 million (margin of 4.3%), and NET PROFIT of €10.8 million.
