

## TREVI ICOS STARTS ITS TENTH PROJECT AT HARVARD UNIVERSITY

*Cesena, 03 May 2010*

TREVI ICOS CORPORATION, a company controlled by TREVI Group, has been awarded a prestigious new contract in the U.S.A. worth about USD 4.6 million in total.

The contract, being Skanska USA the construction manager, involves the construction of a diaphragm at the Harvard Art Museum in Massachusetts (USA). The work of setting up the site and demolition operations have already started and work is expected to be completed by end-2010.

The logistical and geological complexity of the site together with the limited time available for completion of the work demands the high degree of security, quality and professionalism that has always been characteristic of TREVI ICOS CORPORATION.

The Harvard Art Museum was designed by the world famous architect Renzo Piano. The new design involves the renewal of the central building and will include additional exhibition space and art study centres. The building's new wings will, once completed, unite in one single structure the three existing museums: Fogg, Busch-Reisinger and Arthur M. Sackler Museums. The project will contribute to the preservation of Harvard's significant artistic heritage and, at the same time, enhance the research and teaching objectives that are the distinguishing hallmarks of the University.

Stefano Trevisani, Chief Executive of Trevi Group, stated: "This new order represents one of the first contracts issued within a much wider development project for Boston that had previously been suspended. TREVI ICOS CORPORATION, in its tenth project for Harvard University, with this new order confirms its leadership as the leading company for special foundations in the region and hopes to receive further work as a result."

### **About TREVI GROUP:**

Trevi Group is a worldwide leader in the field of soil engineering (special foundations, tunnel excavation, soil consolidation and the building and marketing of special rigs and equipment relevant to this engineering sector); the Group is also active in the drilling sector (oil, gas and water) both in the production of plant and the supply of services, and it also builds automated underground car parks. The Group was established in Cesena in 1957 and today has more than 30 branches and is present in over 80 countries. Its success is due to the vertical integration of the main divisions making up the Group: **Trevi**, the division that supplies special services in the field of soil engineering, **Petreven**, the oil drilling division of the Group, **Soilmec**, the division that produces and develops plant and machinery for soil engineering and **Drillmec** the division that produces and develops drilling rigs (oil, gas and water).

The parent company TREVI – Finanziaria Industriale Spa has been listed on the Milan stock exchange since July 1999. Total Revenues in 2009 amounted to € 1,035.8 million; EBITDA was € 181.8 million (17.6%); EBIT was € 117.4 million (11.3%); Net profit was € 82.2 million
