

HACKER ATTACK ON THE GROUP'S IT SYSTEMS

Cesena, 14 January 2022 - Trevi - Finanziaria Industriale S.p.A. (the "Company") informs that it has suffered a hacker attack on the Group's local data centres, which has resulted in temporary inaccessibility to operational IT functions. The blockage is being substantially restored and the effects on the security of the data processed are currently being assessed with the support of technical and legal consultants, although - as far as it has been ascertained so far - no significant consequences appear to have arisen for the Group's activities or the information managed by it.

The Company has already filed a complaint against unknown persons and will make the appropriate further communications to the relevant authorities within the terms of the law.

About Trevi:

The Trevi Group is a world leader in all-round subsoil engineering (special foundations, soil consolidation and recovery of polluted sites), in the design and marketing of specialized technologies in the sector and in the construction of automated underground multi-storey car parks. Born in Cesena in 1957, the Group has about 70 companies and, with its dealers and distributors, is present in 90 countries. Among the reasons for the success of the Trevi Group are the internationalization, integration and continuous interchange between the two divisions: Trevi, which carries out special foundations and land consolidation works for large infrastructural interventions (subways, dams, ports and docks, bridges, railway and motorway lines, industrial and civil buildings) and Soilmec, which designs, manufactures and markets machinery, systems and services for subsoil engineering.

The parent company (Trevi-Finanziaria Industriale S.p.A.) has been listed on the Milan stock exchange since July 1999. TreviFin is part of the Euronext Milan segment which, following the rebranding of the markets after the acquisition of the Borsa Italiana group by Euronext N.V., replaces the old term MTA.
